NASHVILLE CHURCH WEDDING. August Busse of St. Louis and Miss

Mary Meinert Married. REPUBLIC SPECIAL.
Nashville, Ill., May 31.—Mr. August Busse of St. Louis, and Miss Marie Meinert of this city, daughter of Mr. and Mrs. Henry

city, daughter of Mr. and Mrs. Henry Meinert, were married in the German Evangelical Church to-day, the Reverend Mr. Brauns officiating.

After the ceremony the wedding party went to the country home of the bride's parents north of this city, where a wedding dinner was served and a reception held.

To-morrow the young couple will leave for St. Louis and go to housekeeping at No. 1521 Madison street.

pected to Result From Court's Orders Prohibiting Use of Water in Drilling.

TOWN TORN DOWN FOR DERRICK

developed this new territory. He bought a large area west of Spindletop proper, and practically the entire site of what is thown as Gladys City, rather more than

who were credited with knowing, been fully

ncome of between \$3,000 and \$1,000 a day. For Mr. Higgins has contracted with the Guffey Company to let them take the prodnet of his well at 78 cents per barrel. The Guffey Company has run pipes to the mouth of the well from its various tanks, and the well is doing the rest. Mr Higgins has only to take the money.

to take the money.

While the Higgins well is the only one of the three gushers that have been brought in in this new territory that is still gushing satisfactorily, there is every evidence that a score or more others will be brought in within the next sixty days, as drilling rigs are as busy as they ever were in the palmiest days of "the hill."

The other two graphess were as counting

with sand, when its production dropped to only a few hundred barrels. It is regarded as certain, however, that this well can be cleaned out and made to flow as well as ever. Mr. Stribling has no real complaint to make about the success of this well, in-sofar as its financial returns to him are concerned. He got the ground on which it stands as his fee for drilling in the Higgins well, and a few days after it had been brought in he soid it to a combination of local capitalists for \$40,000 cash.

He made from \$30,000 to \$35,000 on the deal, and probably got more than any driller ever did for drilling in two oil wells. The former high price was \$15,000 haid to

Mally Eastham, receiver of the hill un-der the orders of the District Court, declares that the proving of this new field has practically doubled the area of Spindletop. It has already been proven that there s oil in great quantities 3,000 feet west of the Gober tract, which was formerly regarded as the extreme western limit of the presen area; and there are many oil

Three New Wells Brought In From Territory 3,000 Feet West of Proven District.

NEW GUSHERS DOUBLE

SPINDLETOP FIELD

Longer Life of New Region Ex-

REPUBLIC SPECIAL. Beaumont, Tex., May 31.-Westward the star of Spindletop has taken its course, and real, genuine gushers are being brought in fully 3,000 feet beyond what was until very recently regarded as barren field. Pattillo Higgins claims credit for having

eleven years ago.

He declared then that he was going to prove that it had oil underneath it; he con-tinued to make the declaration even after

paimiest days of "the hill."

The other two gushers were as genuine gushers as ever gushed, but the Hecht-Peristeln-Gordon well, which was the first one brought in, was choked up by lost drill pipe that had been twisted off. Effort is being made to clear this well out, in the certainty that if such a thing can be done it will be as good a gusher as is the Higgins well.

GUSHER CHOKED WITH SAND.

The Stribling well the third of the tric.

The Stribling well, the third of the trie, was successful until it began to choke

Joseph L. Wenrick Is Cuarged Wish Wife Abandonment by Paime Wife Abandonment by Paime Wirk, Who Gave Him Survey I was pointed out to a policeman at Third and Washington avenue yesterday morning at 7:30 o'clock by Mrs. Emma Wenrick, his wife, a few minutes after he returned to the city from Greening back to St. Louis, and she met him when he came across the bridge. She had been informed in a letter from a friend at Greenville. The information that her husband was coming back to get work reached her several days ago, and since it was received she has been watching for him. A few minutes after the arrival of every train in East St. Louis from Greenville She has been watching for him. A few minutes after the west end of Eads bridge, expecting him to come on a street car from the East Side.

Her patience was rewarded by his appearance yesterday morning, and when

men who declare their belief that oil can be found at all points between the Gober tract and the Higgins well.

Oli men say that this newer part of the field will probably be more carefully pro-tected, and will, therefore, be likely to re-tain its glory for a longer time than did Spindletop.

tected, and will, therefore, be likely to retain its glory for a longer time than did
Spindletop.

There will not be so many holes drilled
in a given area, for one thing; and then, the
methods of drilling will be more careful
than were those at first employed. Spindletop has proven that the excessive use of
water in drilling is certain to operate
against the excellence of the field when
the gusher stage is passed.

The water will certainly "come back,"
and cause more trouble than the saving that
is effected by if in the process of drilling.
The District Court has taken charge of the
matter now, and has issued the edict that
the use of water and "gumbo" in drilling
must be limited.

This ruling, it is expected, will result in a
grest lengthening of the life of the entire
field, and especially of the newer part. Predictions were made long ago that the owners of wells would regret the flooding of
the oil stratum with millions of barrels of
water; but nobody paid any attention to the
warning until after the nessing of the first

the oil stratum with millions of barrels of water; but nobody paid any attention to the warning until after the passing of the first gusher era, and the alarming appearance of water in the wells. As this water trouble has, to a large extent, disappeared, it is hoped that the injury was only temporary, and that the restrictions now placed about the drilling of new wells and the reopening of old ones will result in eliminating the water trouble altogether.

NO DROP IN PRICES NO DROP IN PRICES.

caused any slump in prices, which remain firm, in the neighborhood of 80 cents at the well, or 83 cents loaded. Contrary to general belief. Spindletop production is so great that the addition of 5,000 barrels daily s of little consequence. There is an immediate market for every barrel of oil that s produced, but several of the producers

mediate market for every barrel of oil that is produced, but several of the producers are holding to as much of it and for as long a time as possible.

It is believed that prices will continue to rise. This belief is based on the fact that the two immense refineries that have been building for several months are practically ready to begin operations.

These refineries will use enormous quantities of the crude oil. One of them, the Burt refinery, is Standard Oil property, and represents an investment of some \$3,000,000. The fact that the Standard does not appear to be such a contender in the open market as is the Guffey Company is accepted by some people as being evidence that its supply is well arranged for. Some persons profess to believe that its pipe lines from Sour Lake, where it owns and controls by far the greatest part of the proven field, will so a long way toward giving it all the oil that it wants for its Beaumont refinery. This pipe line has just been completed and placed in operation.
